Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

RA Gear Leg, Propeller, RA Wing Tip

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Incident date: 7/11/25

Time: 3PM local time

Location: mouth of North Creek, 30 miles SW of Nelson Lagoon

Conditions: beach landing, slight haze on landing surface

Wind: variable

I was landing on the beach, which I had been in and out of many times. This situation requires you to land just beyond a creek bank. Conditions were desirable to operate at the site. Unfortunately, I missed clearing the creek bank, which the slight haze may have made a difference in my sight observation. The tires clipped the creek bank, which made the aircraft move slightly upward, which I compensated for and made smooth contact with the beach as would be the case in a normal landing scenario. The airplane continued in a straight flight path, however as the aircraft slowed it was evident that the right gear leg had collapsed, as the aircraft settled to an attitude less than normal on the right side. As the aircraft slowed and settled, the right wing encountered the sand and the drag made the aircraft do a wide radius turn of about 270 degrees to the right before coming to a stop. After further observation, the right gear leg had come completely off just after the initial contact with the bank. The right-hand gear leg was positioned just beyond the initial contact point. The aircraft came to a stop below the high tide mark, therefore efforts were immediately made to get the aircraft moved above the high tide mark, to eliminate any further potential damage or loss.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
