Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Left and right horizontal stabilizer significant damage
 Left wing tip cover detached and destroyed, leading edge impacts from brush/trees
 Right wing outer 1/3 severely damaged/bent
 Fuselage behind window/baggage compartment torn and severe buckling.
 Multiple dents across cowling and belly from brush and small tree impacts.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

IA - Incident Aircraft
 IP - Incident Pilot

IA flew from Lakewood Airpark (78AA) on the evening of 18 Aug 2025, stopped over for 1hr at Slide Creek Strip (EIL 171/38), and arrived at East Hayes Creek Strip (BIG 216/23) without incident at 2030AKDT. Hayes Creek Strip has trees in close proximity to the runway which rise about 15 feet above the gravel based surface, with low brush on either side and some grass/vegetation on the landing surface. IP had flown into and out of E Hayes Creek strip a week prior without incident at similar aircraft loading and conditions, but with a slightly higher headwind estimated at 10kts.

The next morning, IP planned for takeoff at the start of civil twilight (approximately 0445AKDT) for return to 78AA. At that time however, IP assessed insufficient light was available for takeoff and elected to delay for 30 min by which time light conditions improved to within IP limits. IP noted winds to be generally out of the south at an estimated 5kts. IP warmed up the aircraft and performed normal checks, observing proper indications. At approximately 0525, IP configured the aircraft for takeoff south into the wind and ran the engine to full power with brakes held. No unusual engine indications were observed. Upon brake release, IP assessed normal acceleration and performed a max performance takeoff. Approximately 800ft down the runway, IA began to lift off as expected.

Upon reaching an estimated 900ft down the runway at 15ft AGL, however, the IA unexpectedly began to sink despite no obvious signs of an under-performing aircraft. IP attempted to overcome the sink by smoothly but positively applying additional back stick pressure. Unfortunately however, the IA was unable to achieve positive lift and did not clear the small trees entirely. The elevator contacted the trees, slowing the aircraft and further increasing sink. IP continued holding back pressure at the edge of the stall warning horn while applying aileron and rudder inputs to maintain straight ahead flight as the aircraft sank onto the landing gear. Upon settling onto the surface, IP applied brakes, just as IA left wing struck a group of brush and trees, causing abrupt left yaw. IA subsequently rolled to the right and dug the right wing through brush and across the ground. Tail wheel and horizontal stab impacted terrain/trees in the yaw, bringing the IA to a stop about 200-300 feet from the departure end after 135deg of turn.

Speaking after the incident with pilots who have flown in that area, IP found that wind shift/shear was commonly noted.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

IP should consider implementing a larger margin for operating in unfamiliar areas. IP previously demonstrated ability for takeoff distances well within the ~1100 feet available; however, when operating in new(er) areas, IP should pad those distances by a larger percentage to create more safety buffer against unforeseen environmental factors.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Unknown, not expected; cause of sink undetermined.
