Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Prop Strike, both wings and struts, rudder and vertical stabilizer

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

While conducting Public Aircraft Operations in an official capacity, I landed on a strip near the confluence of the Skwentna and Hayes River to scout a possible camping site. I walked the area and decided to fly around for a bit longer then return. I taxied to the east end of the strip for my take off roll planning to take off to the west, the same direction I had landed. The wind felt negligible but had been coming from the west when we landed. There were a few bumps on the east end of the strip. I began my take off roll and everything seemed normal. The tail lifted off the ground as I rolled over the bumps. The plane became airborne as I applied flaps. I felt the plane slow then it descended and bounced on the strip. It appeared I would not have enough speed to complete the take off so I chose to abort the take off. I pulled the throttle to idle and applied brakes while holding the stick back. I felt the tail come up and released the brakes but the tail continued to rise and the plane flipped over coming to a rest on it's back. I shut down the power and magnetos and got out of the plane.
