Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Prop strike, Front Fuselage damage, Left strut, vertical & Rudder

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We were landing on a large open fairly flat area
 I made several observation passes, I picked out the landing
 location. I got set up to land. I ran downwind. I showed
 60mph tail wind I turned base to final, finished set
 up for landing (Trim Carb heat, Flaps) touched down and
 was almost stopped and had wind shear under left wing
 I reacted with left stick but the wind spun the plane to
 the right. the right wing tip hit the ground the plane
 came back to center then the wind lifted the tail up
 and flipped the plane over on it's top. we unhooked our
 belts and got out. I manually turn on the ELT.
 (7:30 pm ish) we were picked up around 9:30pm

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

Not sure maybe dump the Flaps 5 or 10 seconds earlier
 that might have kept the plane from flipping over
 but I don't think that would have prevented the
 ground loop.
