Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Leading edges of both wings dented in multiple locations. Prop bent. Landing gear broken.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Flew 1/2 mile from hunt camp to location of harvested moose meat. Loaded 1 hind quarter and 1 front shoulder into aircraft. Takeoff strip was 200 yards downhill slope approximately 170 degrees on the compass. Wind was light and variable approximately 5 mph from 340 degrees. I calculated that with the downhill slope the aircraft would easily achieve sufficient airspeed to overcome the light tailwind. Aircraft got airborne into ground affect but sank back down when I attempted to clear the alders at end of strip. Aircraft impacted alders.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Multiple options were available to prevent this incident. 1. I could have moved the meat to the top of the hill and taken off into the wind. 2. I could have taken off empty to assess the conditions and performance. 3. I could have waited for more favorable conditions.
