Date July 31 2011

Aircraft: Alon 5647F

Aircraft was fueled tanks topped off prior to departure. Departed Charles City IA (KCCY) for destination Cherokee IA (KCKP) departure time 11:30 am (local). At approximately 12:30 local time, the engine began running rough and lost some power, I suspected carb icing due to the current atmospheric conditions. I performed recommended emergency procedures. I applied carb heat and after several seconds the engine began running normally again. I continued on course and after approximately 5 minutes the engine again began to run rough. I applied carb heat again and the engine regained some power but I was concerned it was not producing full power. I decided to choose a road and make a precautionary landing. As I descended to the chosen road I observed a power line and a fence bordering the road. I decided the road was not an ideal landing spot and I was concerned that the engine would not make full power for a successful go around so I elected to continue the landing in the field next to the road. The aircraft was damaged during the landing.
