NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

Left K34 (Gardner) at 12:50 p.m. in route to K59 (Atchison). Reported 5 miles south of K59. Entered down wind base and final to runway 16. Upon entering final, configured aircraft for 260 degree crosswind landing. Touched down on right upwind main. Rolled approximately 300 feet, entering area of rising terrain to the west side of runway. Rising terrain blocked crosswind causing right wing to dip and aircraft veered to left. Corrected with left aileron and right rudder and brake. Aircraft departed hard surface onto grass at approximately 40 degree angle. Grassy area was soft from recent rains. Aircraft was in 3 point attitude when leaving hard surface. Before stopping, aircraft nosed over landing on it's top.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Possibly, landing long behind high terrain which would have dissipated most of the crosswind.
