NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

It was training solo flight. I came on normal approach to runway 15 during traffic pattern. I did touchdown after touch down the plane skipped and turned to right and I controlled to keep it straight. however during control the plane turned to left and I tried to control to keep it in the center line of runway. The plane drifted to the left side of runway. I did try to control however the plane got of the runway asphalt to the the grass belt and continue to role. down about 100 feet there was as dip for waterway or just a ditch my plane ran into this low depression and hit the nose of the plane and stopped. I cam out of the plane. It was about 10-20 mile speed at that time. There was collapse of nose gear and propeller. I was in front of airport building at that time. No damage to the airport property or any lights at all

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Non. This is my control error.
