NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

I was landing on runway 04 after returning from Lake Tomahawk (WI36). Touched down normally and began my rollout. Nearing the end of rollout, a huge unexpected gust of wind (about 20-25 knots out of the west) lifted my left wing off the ground and pushed the tail off to the right causing the airplane to face to the left. I tried to correct but did not have enough lost rudder authority. The airplane then skidded to the left and went slightly off the left side of the runway. The right wing dug into the dirt causing the damage.

When I checked the ATIS information just prior to landing, the reported winds were 050 at 10 knots with no gusts. Also, the wind T indicated that the wind was from about 050. I was very surprised when I caught the gust of crosswind wind on rollout.

RECOMMENDATION (How could this accident/incident have been prevented?)
