NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

On Wednesday, November 30th, 2011, I pre-flighted the L-19 and departed from Gillespie County Airport (T82) at 0800 hrs CST., in calm conditions from Runway 14 for New Braunfels (KBAZ).

Prior to departure the aircraft fuel tanks were topped off with 42 gallons of 100LL aviation gas. The fuel tanks were sumped and the fuel selector valve was set to the left or 'Main' tank position.

After arrival at approximately 0845 hrs CST., I secured the aircraft and turned the fuel selector valve to 'OFF' position. The flight to KBAZ used 9 gals of fuel.

Prior to start-up at approximately 1030 hrs CST., for departure from KBAZ, I switched the fuel selector to the right or AUX tank position and departed to the Northwest.

At approximately 1130 hrs CST., 5nm miles South of mid-field to T82, I announced my position with the intention to join the right down-wind for Runway 14 followed by position reports on down-wind, base and final.

When established on the glide slope for final to Runway 14, I experienced a total loss of power that did not respond to any inputs from the throttle or mixture controls. I adjusted my landing for a relatively level rectangular vacant dirt field approximately one mile North of Runway 14.

The aircraft landed intact somewhat in the middle of the vacant field.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

For aircraft parts that require protective or safety related removable covers or inserts ensure that these are fitted with standard Red 'Remove Before Flight' tags.

Improve attention and complete compliance to the aircraft pre-flight inspection protocol before each and every flight.
