NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

topped off fuel tanks -
did normal pre-flight, using checklist
DID run up including check of brakes, which held.
during the run-up. Took off Runway 18 to stay in pattern.
Went around the normal pattern - landed runway 18 -
all was normal - Landed at about 70 mph
(my airspeed indicator is listed in mph, not knots)
had already pulled back power as came in.
used hand brake to slow + stop, but they weren't
~~working~~ or ~~stopping~~ doing anything. ~~then~~
Passed first turn-off at midpoint, got to end of the
runway + felt I was going too fast to make the turn-off
safely. Thought the grass at the end of the runway
was safer. What you can't see from there is
the ~~ditch~~ that comes up after the grass.
It came up fast - It was too late - went
into the ditch, picked up speed on the way down +
hit a concrete culvert. - Brakes didn't work.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Don't think it could have been, no warning on
the brake failure. Brakes have been giving me
problems since I began flying the airplane. I checked the
brake fluid well is very small - I always give
the brakes a good look before taking off. Have talked
to mechanics about choices - converting the
hand brake to toe brakes or having a kit
installed that replaces the small well with a
bigger one - Had intended on doing something at
the next annual, which is due in September.
But had recently had the well filled.
