NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained. Aircraft was on it's first flight of a 40-hour test flight program. Pilot departed airport at 0810 and climbed to 12,000 MSL. Pilot began a series of straight and level passes over airport checking aircraft's stability and systems. Pilot noted a slowly increasing oil temperature. At approximately 0830 pilot radioed he had lost oil pressure and almost immediately thereafter that the engine had quit and he was "going down" and "going to try to make the road". Aircraft's rate of descent was such that he could not make the intended landing site. Aircraft was landed in a field. Landing gear was left retracted to minimize damage to aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

The remote oil filter adapter was installed per the manufacturer's instructions. Upon examination and disassembly after the incident it was discovered that the adapter body was tight and properly safety wired. Because the installation of this part was done properly I have no idea as to why the gasket failed as it did. My only recommendation as to prevention would be to avoid using the Aircraft Development Corporation Remote Oil Filter System.
