Hello Craig,

This is one of my outstanding events from the weekend that I just received confirmation from the FSDO on Substantial Damage.

In addition to the 8020-9 information, here's what else I have.

DAL FSDO – Mr. Gavin Hill ([REDACTED])

Airport – 7TA7 (PVT)

Circumstances according to DPS trooper and witnesses:

Large flying event on Saturday, Oct 27th at this private airstrip/ranch. During landing, the airplane touched down, bounced, and on the 3rd bounce, the airplane's mains touched down and the airplane flipped. Substantial damage to the forward fuselage and empennage (vertical and horizontal). The pilot, Mr. Michael Payne ([REDACTED]) was not injured, and the passenger sustained a minor knee injury. Suppose ably there was a camera mounted on the airplane and the FAA was going to track down the video. The FAA has not spoken with the pilot, who had departed the accident site prior to his arrival.

Folks familiar with the accident reported the pilot did not experience any mechanical issues with the airplane.

That's what I know.

Mr. Hill is gathering information and is willing to discuss this further as needed.

Thanks!

Aaron
