PILOT: Andrew Diener

COPILOT/CUSTOMER: Kenneth Hopper

PASSENGER(S): None

NARRATIVE: Customer entered a right 180° Auto
to lane 4. He slowed down to approximately 60 kts,
initiated a turn towards the runway. We continued
the approach, Customer slowed the airspeed to approximately
40 knots, shortening our approach angle. I told him to
increase his speed as we approached the area between
the circle and pad 1. I believe we initiated ^{pulled} deceleration
at approximately 8-10 ft. I told him and simultaneously pushed
forward cyclic while holding the collective in place. I used
what was left of the rotor RPM to cushion the landing
and I believe we hit left skid first, slightly ahead of
the right and slid
forward about 8-10 feet.
