NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

June 28, 2013

To whom it may concern:

On June 28, at approximately 1100 hours I departed runway 4 at Paragould, AR airport, KPGR, on a flight with a final destination of Grosse Ile Municipal airport, KONZ, in Michigan.

Weather was good VFR with light winds out of the west. Altimeter approximately 30:05 inches, from memory. I was operating under VFR flight rules with no flight plan on file.

On climb out at approximately 2500ft MSL and maybe 5 miles NE of the airport, with all systems and indications normal, the engine developed an immediate and heavy vibration. All engine parameters and systems appeared normal. Switching mags L&R had no positive nor apparent affect.

I immediately turned towards the airport planning to make a straight in to runway 22. It didn't take long, maybe 10 to 15 seconds, to realize the vibration was getting progressively worse. I was trying to decide if shutting the engine down would be a better option than letting the vibration get much worse. I never had to make that decision. The vibration got very smooth, very quiet, very quickly. Looking out the windshield, I realized the propeller had separated from the aircraft.

I started preparing for an off airport landing. I selected what looked like a suitable field. The approach and landing from a right base to the field was successful. The field in my opinion, did in fact turn out to be a good choice.

There appears to be no structural damage to the aircraft.

Clifford Miller

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

Despite the fact that I do not hold an A&P license, I know propellers are not supposed to separate from aircraft. I truly have no idea how this incident may have been prevented.
