NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

I arrived at KACQ at 7:00am CDT and obtained weather from www.aviationweather.gov/adds for the KACQ and KMKT area. I did a pre-flight inspection of the aircraft and removed tie-downs on N8803Z. At 7:45am, I started the engine and taxied over to the loading area. The loading crew loaded the airplane with 200 gallons of Chemical weighing 1600lbs. I taxied out to the runway and proceeded with a run-up check of the engine, propeller, and flight controls. With everything in working order, I checked for traffic and departed at 7:50am CDT from runway 33 at KACQ and flew directly to the field near Eagle Lake, MN. At 8:03am CDT, I arrived at the field shown in the attached map and proceeded to circle the field three times to check for obstacles and made notations on the map about starting time and decided to fly the field with a left back to back pattern. At 8:05am CDT, I entered the field from the north at the northeast corner of the field and set my AB line with the spray off. Using a teardrop pattern for turning around, I applied chemical at an altitude of 15-20ft AGL. On my fourth pass moving I pulled up to avoid the treeline on the south edge of the field same for the previous passes to avoid the trees. I noticed I was getting too close to the tallest tree in the row and applied full power and pulled at max elevator deflection. I clipped the top of the tree with the right wing and the airplane yawed to the right. After getting clear of all obstacles, I surveyed the damage and with good control of the aircraft, I made a straight in pattern to land on runway 33 at Mankato Regional Airport. I checked for other traffic and landed on runway 33 and taxied to the ramp with guidance from the ramp personnel. I shutdown the engine and exited the airplane.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Check for Obstacles before entering a field. Get plenty of rest, plenty to eat and prepare a plan for flying the field taking into account for obstacles. Use better Situational Awareness.
