NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

I, Bobby Joe Smith (Commercial License [REDACTED]), on July July 31, 2013 at or near 1:30 p.m. left a small private, paved strip on county road 906 of Craighead county in my Cessna 140 for a short, pleasure flight. The terrain is basically flat farm fields for miles. I was accompanied by Jim Cambell of Daytona Beach, Florida. The strip is a North south runway just East of Jonesboro, Ar. and West of Lake City, AR. The wind was out of the southwest with gusts so I taxied to the North end for takeoff. After a flight of 20 to 30 minutes I returned to the strip for landing. I approached from the North which gave me a quartering head wind for landing. There is corn nearly 8 feet tall growing on both sides of the runway. I set up for approach with full flaps and touched down on the North end of the runway. I took a small bounce back up in the air after first touchdown and when the right wing went above the corn I must have caught a wind gust above the corn. The westerly wind raised the right wing abruptly. I then countered with full ailerons to the right. The wind continued to hold the wing up and we veered accross the strip from right to left. I tried to get it to settle but it wasn't working ! I was past the stopping point now. I then went to full throttle and released the flaps to the neutral position. By now the chain link fence on the South end of the runway was closing in fast so I attempted to pull up over the fence when the landing gear struck the fence. We then went accross the gravel road and into a soybean field skidding to a stop. We did not overturn but came to rest on it's belly in the field. Myself and the passenger were able to open the cabin doors and exit safely. I then checked for any leaking fluids. Ther were no fluids leaking so I returned to the cock pit and put the fuel selector in the off position, I also moved the master switch to the off position. This should have put the accident at or near 2:00 p.m. I then called the FAA in Little Rock, AR and reported the accident. I called information for the number. With that taking place it would put the report somewhere near 2:45. After reporting to the FAA I then called Kimmel Aviation Insurance in Greenwood, MS. to report the accident

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I should have initiated the go around after the first contact with the runway, it would have avoided loss of runway space. This would have allowed me more time to regain speed and return to flight.
