NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

Cruising at 8,500 msl. switched from right fuel tank to Aux. tank. Flew about 10-15 minutes, manifold pressure dropped to 15 inches. Switched fuel selector to left tank. Engine would not restart. Engaged boost pump after switching to left tank. I headed for the first road I saw. Touched down uphill nose high. Travelled to top of road and could not negotiate turn. Aircraft bounced to right veered off road, travelled about 100 yards on rough country and went back onto road went about 25 ft. and stopped.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Not sure.
