NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

Left Sarasota, FL previous day at 1:00pm for Fargo, ND. Stayed overnight at West Point, MS. We departed the next morning for Roosterville as a landing location for a overnight stay with a relative. We refueled at Poplar Bluff MO prior to arriving at Roosterville. On landing we were hovering at about 1 to 2 feet off the ground ready to set the helicopter down when the wind gusted and shifted. The rear of the helicopter raised and the front lowered into the ground with the main rotor blades striking the ground and tipping the helicopter on it's side. On striking the ground the wind shield broke apart and I turned the master switch off and key off before starting to help my wife with her seat belt. Paul and Gary from the airport were there within minutes, verified that there was no gas or oil leakage. They and others then helped us get out. FAA was then notified. The seat belts and fuel bladders worked great.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

This would not have happened if I had the helicopter facing into the wind.

The seat belts did a great job and so did the fuel bladders.
