

MEMORANDUM FOR RECORD

Michael Hicks

Air Safety Investigator

(GAAID) General Aviation Accident Investigation Division

MAY 12, 2016

NTSB Accident Number: CEN14CA460

Aircraft Registration & Make/Model: N776BC, Aviat Aircraft Inc., Husky, A1B

Accident Location: Steamboat Springs, CO

Accident Date: 01AUG2014 @ 1300 (MDT)

Subject: Record of Conversation with Student Rated Pilot – Brian Campbell

Per conversation with the Student Rated Pilot (SRP) regarding an aviation accident which he and his Certificated Flight Instructor (CFI) were involved, the following is a summation of the telephone conversation between Mr. Campbell, and the NTSB Investigator in charge.

After informing Mr. Campbell that the NTSB accident investigation involving N776BC was still open and that the investigation has been assigned to a different NTSB Investigator, he elected not to speak with the NTSB Investigator in charge, insisting that he would prefer to speak with the CFI and the FAA Inspector initially assigned to the accident, Yancey Rushton. The conversation ended and both parties contacted Mr. Rushton.
