NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

I finished my chores and thought I'd take a quick flight around the Frontenac Area to view some of the Big Bucks. Around 7:30 P.M. I knew my fuel was low and I watched the fuel in my line that goes from the Top of the Tank to the Bottom. It showed about 5" of fuel @ takeoff. My 1st 5 min. I headed North and saw no Deer so I banked left N.W. about 5 more min. still no Deer. Banked left again S.E. Fuel line down to about 4" from empty. Started seeing lots of Bucks flying about 100-200' above the hills 600' total. 15 min. Into flight about 3" left and about 1 mile from landing the engine stalled. I primed it and got a quick shot of power but with my altitude loss I picked my landing sight. A low section of standing corn. The plane hit a bit slow, nose wheel hard + flipped around backwards + stopped. 10-15 yds.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

- #1 I never should have went up with so little fuel.
- #2 I shouldn't have trusted the gas a saw in the line. Only about 1-2" above the pet cock.
- #3 I should have been much higher with more choices of landing strips to choose from.
