Me and my partner was coming from ~~the~~ town driving in front gate and saw the explosion on top of the hill. We never saw the plane or herd it.

Maria Dempsey

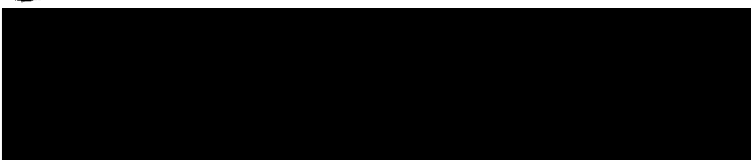

~~We~~

I heard the engine noise
got louder and then I
heard the boom.

~~We~~ I ran outside and
saw cloud of smoke

We were in a unit and
I heard a plane flying around
it seemed like it was flying
around ~~the same track~~ for
awhile the sound sounded like
maybe circling then it sounded
like it went into a nose dive
and boom after that and no more
sound of plane. We ran out because
we knew something happened and
looked up and saw a small cloud
of black smoke

Cell

Driving in front gate. Looked to the
North west and saw a black plume of
Smoke and small type of explosion followed
by "Blue or white smoke briefly. Really foggy
& windy so smoke did not stay long. Told
my Co Worker that was no brush fire. Immedi-
ately met Donn Edwards & said to call 911!

Mike Bailey - GROUNDS FOREMAN / TEXAS TECH

Viewed smoke plume from downtown area. Smoke was blackish to grayish color.

noted it was located near Texas Tech ~~prop~~ property but was unaware of crash.

Spoke with person near center of town who heard sputtering engine as it passed over town.

Donn S Edwards

I was sitting in my truck on campus (JTV Junction) with my window down and heard an aircraft approaching which sounded like it was very low and moving quickly. Suddenly the pitch of the sound changed as if the aircraft had either pulled up or increased throttle. At that point I looked in the direction of the sound and briefly saw an aircraft for less than 2 seconds before it disappeared behind a hill and impacted. I heard an explosion and saw a smoke plume. At that point I reported it to Raymond McDonald who called the incident in.
