

Las Cruces International Airport
Southwest Aviation, Inc.
Las Cruces, NM 88007

To whom it may concern:

After the aircraft accident on August 27, 2014 involving an aircraft that might possibly have been serviced here, we quarantined our refueler designated JET-2 and ceased all fuel deliveries until after the fuel quality inspection was completed.

Samples of aviation JET-A were tested separately from each of the following:

JET-2 Mobile Refueler:
fuel delivery nozzle
all sump drains

White Bucket Tests- Samples of fuel in a clean white bucket showed the following: the fuel was the proper color and clarity. There was no evidence of debris or other contamination, and no water was present. The smell and feel of the fuel did not show any evidence of contamination.

Other Fuel Tests Performed:

Millipore filter tests showed clean fuel with no visible debris in the filter element

At the completion of the satisfactory fuel quality tests the quarantine was lifted and fuel deliveries were allowed to resume beginning on 8-30-14 at 10:00 mt std

August 30, 2014 10:30 mt std
