Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to nose area of aircraft including nose landing gear sheared off during accident sequence.
Right Main Landing Gear Door sheared off during accident sequence resulting in minor fuel leak.
Possible fuselage damage currently under evaluation.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately 0847 local time the aircraft had a runway excursion from the departure end of Runway 01 at Conroe Lone Star Airport (KCXO) after landing on a positioning flight from Nashville, TN (KBNA) departing at 0706 local. Preliminary information suggests that the approach and landing were normal until the pilot flying attempted to apply brakes after landing. The crew reported that normal brakes were not effective in slowing the aircraft and they elected to use the emergency brake system to attempt to stop the aircraft. The aircraft departed the runway, proceeded through the runway safety area and came to stop in stream bed approximately 450 feet from the end of the runway. At the time of landing heavy rain was reported.
