Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

February 13, 2014

To Whom it May Concern;

Approximately five o'clock pm Sunday February ninth I had turned inbound for final and was approximately 1000 feet bleeding some air speed off to drop into the white arc for flaps. As the plane slowed and I was cleaning it up, I was about to put flaps in when I proceeded to push the throttle in to keep between eighty to ninety knots when I noticed there was no power as I pushed the throttle in. After trying it a few times I noticed that there was a little run of the engine with in the first inch of the throttle but nothing after that. So I proceeded to try to slowly add the throttle in but once it passed that initial inch the engine was not responding at all. I then tried the throttle with the fuel selector on either side and received the same response from the engine. Once I had returned the fuel selector back to "both", I reverted back to my training and pulled the carb heat. At this point I was approximately 500 feet, short final and the very next thing was the engine completely quitting on me.

At this point I was short final, low and slow. There's a house with trees all around it just across the street at the end of the run way so putting it down short of the runway was not an option, I knew at this point I needed to pick a field. To my right was rolling hills, a large pond and wooded areas and a lot of fencing but to my left was a field that looked to be less hilly. I made my turn and attempted to make the field. As I was coming down hopping to miss the cow fence on landing my nose wheel caught the fence and pulled me nose in instead of a normal landing. Once I hit the plane slowly rolled over on to its back. At this point I unbuckled myself and proceeded to make my way out of the plane and called Cindy the owner operator. Within a few minutes Cindy and the property owner were on the scene.

Understandably I was shaken up so we gathered everything up and returned to the drop zone. After gathering my thoughts and collecting myself I jotted some notes down about what happened and proceeded to try and get some sleep. As soon as 8:30 am rolled around Monday morning (02/10/14) I called Mr. Thomas right away at the Huston FISDO.

If I can be of any more help, please do not hesitate to contact me at any time.

Yours truly,

Keith W. Hoyle
