NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

On my second pass along south border of field in order to avoid powerlines I sprayed two swaths of spray mix parallel to powerlines. Three quaters of the way on second pass the engine failed. I entered an autorotation I was flying @ 80mph approx. 16-18' AGL due to low altitude flare was shallow upon leveling helicopter and touch down there was a 24-30" terrace or berm in field. Had about a 10'-15' ground slide which went up one side of berm and came to stop on back side of berm. As a result of helicopter nose up & down movement the MAIN Rotor blade struck the tailboom severing it from the aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Depends on why engine failed!
