Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

FUSELAGE AND WINGS SUFFERED SUBSTANTIAL DAMAGE

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was returning to KUES after a sightseeing flight with a stop at Watertown WI. The airplane was topped off with fuel at KRYV at around 12:00 to 12:10 pm cst. We departed KRYV at around 12:20 to 12:30 pm cst. On the flight to KUES from KRYV, we did some sightseeing maneuvers in the vicinity of Lake Nagawicka. I contacted the KUES tower around 12:40 to 12:50, about 10 miles, out for a full stop landing. I was instructed to report right midfield downwind 28, which I did. KUES tower cleared me to land runway 28. When we were abeam the numbers (28), the throttle was reduced and carb heat was turned on. I confirmed that the fuel pump was running. On downwind prior to turning base, one notch of flaps was engaged. As I turned base, I engaged another notch of flaps. While on the base leg I tried to add some power by pushing the throttle in, but the engine failed to respond. Even full throttle did not produce more power. I tried moving the throttle and carb heat controls in and out to no avail. As I was trying to add power, I turned directly towards the airport. I declared an emergency with my passenger, and sent one mayday to the tower. Without engine power, we failed to reach the airport. As we flew into some trees, I pulled back on the yoke as much as possible to minimize my airspeed. We hit the trees and two tree trunks engaged the right wing between gussets and flung the plane 360 degrees and off to the right where we crashed into more trees, going down to the ground. The cockpit glass shattered and the airframe buckled before hitting the ground. On the ground I turned off all the switches and removed the key. We exited the airplane as quickly as possible around 1:00 pm cst.
