Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Nosewheel collapse. Damage to cockpit, wings and vertical stabilizer.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I took off at 1420 to do some touch and gos for practice. On my first approach, I was wide right after turning final and executed a go around. My second approach was better, but even though I came over the numbers at the recommend 60 kts, I stalled the aircraft too high and it struck the runway very hard and bounced high. Instead of going around, I tried to gain control of the aircraft and on the second or third bounce the nose wheel collapsed, the prop dug into the turf runway and the aircraft flipped over on its back.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I could have executed a go-around.
