Hello Gordon and Jim,

I wanted to pass along some information that may be helpful to the investigation of the accident involving N9922V and Jeff McNamee. On Thursday morning, December 25th, one of my pilots was flying over the crash site and spotted a water leak that was located approximately 550 yds NNW of the crash location. I did contact the pumper and asked him to let me know if he thought the leak had been running for a couple of days. He did confirm that it had been leaking for a few days given how large the leak was. My pilot who found the leak felt like this was what Jeff McNamee was looking at and possibly circling at the time of the accident. The coordinates of the leak are N31 59.235, W102 31.884 and the coordinates of the crash site are N31 59.026, W102 31.677. I have attached images that the pumper took of the leak from the ground and two images that my pilot took from the air on December 25th. The portrait image from the air shows both the leak and the airplane wreckage.

I also learned from Barb McNamee, Jeff's mother, that she does have Jeff's cell phone activity prior to the crash. She did inform me that the last activity from Jeff's cell phone was at 8:51 am on December 22nd. She indicated that it appeared to not voice or text activity.

If you have any questions about this information, please give me a call at [REDACTED]

Thank you,

Hi Jim,

Below please find the contact information for Jeff's roommates. I will continue to look into the cell phone information and pass it along as soon as possible.

Tristen Thomas [REDACTED]

Joel Flores [REDACTED]

Please let me know if you have any further questions.

Thank you,

Paige Fulton

Hi James,

I wanted to provide an update to your requested information from the phone conversation we had on January 5th.

Jeff McNamee's approximate total flight hours are 2033 hours. The cell phone records show that no phone calls or text messages took place on December 22. There were three data transfers on December 22nd occurring at 12:05am, 8:39am and 9:17am. These data transfers can occur without user input such as updating applications that were running in the background.

Please let me know if you have any further questions.

Thank you,

Paige Fulton
