Martinville, Illinois
August 21, 2015

Interview Summary with Pilot's Spouse

Mrs. Goodwin stated that she did not know the exact intent of the flight, but thought that the pilot was preparing to sell the airplane. She had been in contact with the pilot on the evening prior to the flight and that the pilot was staying at his Nephews house. She provided a list of medications that the pilot was taking due to Colon/Rectal cancer. She said that the pilot had developed it 3 years ago and one year ago the pilot was infected with a sepsis virus. Then, the pilot was cancer free, but within 6 months, the cancer had returned and that the pilot had battled the second round for about the last year and a half.

The list of medications she provided were given to the FAA Aeromedical Office, the Coroner, and the NTSB Medical Officer.

Alexander Lemishko
