Witnesses Names		Best Contact Address		Age	Best Phone		Other Phone		
Description of Property:				Serial Number		Value			
Persons Interviewed									
<u>Synopsis</u>									
On Tuesday, July 14th, 2015 at 1552 hours, I was dispatched to a air plane crash at Clark Airport. I arrived on scene a few minutes later and observed a glider that was crashed at the end of the run way in the grass. I observed leaking fuel, and John Wookey (DOB: ██████████) covered in fuel, injured laying down by the air plane. I observed Air port, Manager Doug Hansen move the Glider out of the way with a fork lift. I took some some pictures of the crash scene and area, and spoke to the passenger, Mark Kelly (DOB: ██████████). KELLY informed me that they just took of prior to crashing, KELLY had an injured foot and was covered in fuel as well. KELLY indicated that he had a cell phone and was had video/was recording while it crashed. KELLY gave me the phone to get the video off the phone. Clark Police Chief Jeremy Wellnitz informed me that he could detect the odor of an alcoholic beverage coming from Kelly, as he did patient care. WOOKEY was transported to Prairie Lakes Hospital in Watertown, SD. KELLY was transported by her mother Mary Kelly to the same Hospital. I spoke with Bill Howell of the FAA office, and informed him of the accident that occurred, he requested that we send him pictures and secure the crash site until we hear back from him. I informed Howell, that I believed alcohol and or drugs maybe involved due to WOOKEY's history. Howell stated he would like to get a blood sample of the pilot. I requested that a Watertown Police Officer, go to the hospital and get a blood sample from the pilot. That officer, Chad Gamber went do the hospital but they were doing X-Rays at that time. I went en route to the hospital to follow up the on the aircraft crash.

CLARK COUNTY SHERIFF'S OFFICE**SUPPLEMENTAL CASE REPORT**

Wookey at that time was incubated. I was informed that WOOKEY was going to get airlifted to Sanford hospital. (Sanford CareFlight Trip number: 15-03584). I requested two blood samples from Prairie Lakes Laboratory staff. Due to the exigent circumstances of them air lifting WOOKEY to another facility, and I did not have time to due a warrant to request the blood samples. At 1815 hours, I observed MLT Ashely Bush take blood from WOOKEY's right arm, and at 1820 hours I observed MLT Ashley Bush take blood from WOOKEY's right hand. The blood samples remained in my possession until they were mailed by the Clark US Post office at 2022 hours on 7/14/15. Nursing staff informed me that WOOKEY's alcohol level was a 46, which means approximately at .040%. Nursing staff informed me that they gave WOOKEY no narcotics. At the hospital I was informed by Mark Kelly that had broken his foot. I met with Watertown Police Officer Lance Hochstatter about taking over the phone. Hochstatter gave me a consent to search form for the cell phone and it was filled out and signed by Mark Kelly and his father Craig Kelly. The HTC One cell phone was given to Officer Hochstatter to give to the dectetives of the Watertown Police Department. On Thursday July 16th, I took back custody of the phone and returned it to Craig and Mark Kelly. I got a Written Statement from Mark Kelly about the accident at that time.
