Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft came to rest in a grove of trees about 5 to 6 feet above the ground on the right wing which had partially collapsed. The right wing broke the fall. Tail section separated aft of the passenger compartment. Minor damage to wooded area behind garage at [REDACTED] Watertown, WI. No personal property damaged other than pilot's aircraft totally destroyed and a few tree limbs in wooded grove.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Preflight intent was to practice landings and/or pattern work in preparation for biannual flight review (BFR). Preflight and taxi were uneventful. Run-up was fine (without problems). I took-off on runway 29 and entered left a left traffic pattern. I had an uneventful climb to pattern altitude which is 1800' MSL. Downwind was uneventful and I did a GUMPF check at midfield. Opposite the spot, I started to descend with 10 degrees of flaps. About half way through base-leg, the engine quit. At which point, I pushed all the levers forward (mixture, prop, throttle) with no effect. Then I activated the auxiliary fuel pump maintaining glide speed (70 Kts). The propeller stopped rotating. I put the nose of the aircraft on the airport and since there were no open spots to land, I chose the trees to break my impact. Because I was in the landing configuration (gear down, prop forward, and flaps full) and at a low altitude I had very little time to choose a spot to land.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I don't know because I don't know what caused the engine to lose power and stop.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
