NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

I took off with 85-90 gallons of chemical and 30 gals of Jet A around 1:20 pm. After several passes spraying soybeans, about mid field and 3'-5' above the soybeans, I heard a loud screech for about 2 seconds and pulled up to gain altitude. I heard low rotor rpm horn and noticed main rotor rpm at 85% and immediately auto rotated to a water way between two corn fields. The whole event was maybe 5 seconds long from the time of engine failure to being on the ground. It was incredibly quick. The main rotor contacted the tail boom upon landing. The helicopter remained up right.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

There was a 3rd stage turbine wheel failure and no sign of degrade in performance leading up to it. The engine ran strong to the very end.
