Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft crashed in a customer rice field and was upside down when it came to a stop. Substantial damage to both wings, engine and fuselage from accident. Main landing gear intact, tail and vertical stabilizer appeared to be more minor in damage. One wing tip knocked off, the engine sustained considerable damage and was pointing downward at about a 45 degree angle following accident. Plane was recovered from the field and dismantled by aircraft recovery company Dawson and Associates. The plane did not catch fire nor were there any explosions associated with the crash. The pilot was able to get out of the aircraft on his own before being transported to a medical facility. He is slowly improving but sustained some major injuries.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Please see attached signed statement from Robert Guthrie on his recollections of the accident. His memory of what occurred is still somewhat impaired due to his injuries. There were no eye witnesses to the accident, so his statement is all we really have to rely on at this point.

RECOMMENDATION (How could this accident/incident have been prevented?)

To whom it may concern,

Date of incident: August 26, 2015

At approximately 1345 central time on date specified, I had just finished the application to the field. It was a nice, clear day with VFR conditions with a light northeast wind. I made the application with north/south swaths to the field. After finishing the primary application, I made a trim pass along the north side (west to east) and came around to line up for a trim pass on the south side (east to west). The next thing I remember is being on my hands and knees in mud in the application field.
