

ASP-2016-0083/2 ARKANSAS STATE POLICE
(Interview of George Huntley)

On June, 8, 2016 I interview George Huntley near his residence in Pine Bluff, AR. The interview was audio recorded and a copy of that recording will be available in the case file. The following is a summary of that interview.

We were sitting in my shop. We thought we heard someone in my pond because it sounded like a boat motor. We got into my side by side and headed towards the pond. We seen the plane go up in the air and turn and go west. He turned and made another loop. The he went down and when he went down he never came back over the trees. The plane was coming back towards the east at that time.

I told Willie I thought the plane crash. We went in that direction but could not see anything. I saw something small sticking up so we rode towards it. It was the plane. When we got there the passenger of the plane had pulled the pilot out. The pilot was unconscious. When I got there he was not responding.

The passenger said that it sounded like the engine stopped. We called 911 and Willie went to met the fire department. I then helped the boy move the old man further away from the plane. The plane was smoking and that was why we moved the body. That was all I know.
