Subject: Radio Calls at KVBT

Hi Matthew,

I can't tell you what times this all occurred. I heard N909RF call in on the radio. I wasn't paying close attention until I heard him say "Full stop, Bentonville" I called Will (our FBO manager) to let him know they are close and coming in. I believe N909RF did one last radio call. Then I heard, "Bentonville Municipal I am on the runway!"

I heard no response from the other aircraft. At that point I saw N909RF on the runway, a delayed silence and a crash.

I asked the pilots sitting in our lobby if they listened to the radio, they said they did not pay attention until they heard the crash.

Thank you,
