Stephanie,

Today we moved the bird from the field to the FBO hangar. Great people there!

What you may find interesting is that we extracted approximately 25 gallons from EACH main fuel tank. Because of how it was sitting in the field I doubt you could have been able to tell what the quantity was in the left wing. The fuel we removed was clean 100 LL.

Tomorrow we will be disassembling the bird for transport and most likely depart Friday before lunch. If you need us to take pictures of anything just ask.

Regards
Chris
