NTSB Accident/Incident No. CEN16LA162	Reviewed by NTSB Regional Office CEN-DENVER	Name of Investigator LINDBERG	Date Report Received 4/27/16
---	---	---	--

Thursday, April 21, 2016

We purchased the aircraft (N51242) at KVIH airport. We had the fuel tanks topped off and I took off at approximately 12:20 LCL. The weather was VFR and forecast to be VFR the entire way to KRVS. On a direct route I transitioned through KSGF approach control then continued VFR direct to Tulsa approach control. On arrival to Tulsa, I called Tulsa approach 119.1, 3 miles east of Claremore. Was given vectors south of town and handed off to KRVS Tower 120.3 and before switching to tower was told to navigate for straight in to RW 31 at KRVS. Current altitude was 2500. I checked in with RVS tower and was told to expect RW31. Started slow decent and around 2300 pushed mixture full rich, pulled carb heat on, and started to reduce power. At that moment the engine quit. I verified mixture full rich, pulled to ½ throttle, and pushed carb heat back in. I turned the engine starter off then back on and the engine started. I added power and got the engine to approximately 1700 RPM and it quit again. I again checked the mixture and decided to try another restart. The engine started and got approximately 1350 RPM then quit. At this point I told RVS tower I had an emergency and was without my engine and going down on or near Memorial Drive in Bixby. Another communication between myself and tower was made but I can't recall the specifics. I picked Memorial Drive and landed South on Northbound Lane. While setting up to land, a car exited the parking lot directly in my path, I pulled to miss him then pushed to avoid the wires. The left wing clipped a sign and spun the plane around then came to a stop facing North East. After coming to a full stop, I radioed the KRVS tower to tell them where I was located. The approximate time was 3:15 pm. I shut off the mags and the master power switch.
