Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> Prop bent. Landing gear detached. Damage to soft sod field was ruts from landing gear.					
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i> Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible. On April 28 at approximately 330pm local time I departed Osage City airport (53K) in Kansas in my 1942 Boeing Stearman. The takeoff and initial climb were normal but at approximately 200 feet I sensed a loss of power and the aircraft stopped climbing. I landed the aircraft straight ahead in a flat and level grass field about ½ mile from the airport. The Stearman can be landed normally on an unimproved field, but apparently due to recent rains the surface was soft and the aircraft came to rest on its belly after the main landing gear sunk into the soil and were torn off. The aircraft is believed to have sustained only damage to the landing gear and propeller blades since the engine had failed. Per normal procedures I did pull the throttle to idle before touchdown. The Stearman is commonly used as a skydive aircraft and two of my skydiving friends were on the wing-walk area of the wing root with their main harnesses secured to the fuselage. No injuries of any kind were sustained and there was no property damage other than to the sod of the field.
