Statement of Observation

Prior to the event ~~the~~ I had made 2 jumps as a single passenger. All aspects of the operation were normal & safe. Before each jump a Ground Demonstration and Practice Climbout were performed. During the event my self and another experienced skydiver were safely strapped to the A/C in the wing-walk area. Taxi and Takeoff were normal. Shortly after takeoff ~~I~~ I heard the engine lose power and as we descended I braced

For impact. The pilot in my opinion [REDACTED]

Did an AMAZING job maintaining A/C control. He maneuvered the A/C expertly
