Narrative Report

On 04-28-2016, at 1635 hours, I was informed by dispatch of a hard landing by a plane in Osage City, KS. There were no injuries reported on the scene. The location of the crash was reported near the intersection of 17th and Brant Street in Osage City. I arrived on the scene of the crash at 1719 hours. The pilot, identified as Nathaniel H. Perlman, said he had a passenger in the plane with him at the time of the crash. The passenger was identified as Raymond James Lallo, from Dillon, CO. Perlman said neither him nor Lallo were injured in the crash.

According to Perlman, he took off from the Osage City Airport around 1530 hours and started a normal climb. During the climb, the aircraft would not gain any altitude. He said he did not have any time to troubleshoot the maintenance issues so he pulled the throttle to idle and attempted to land in a field in front of him. It appeared as if the plane's landing gear broke off of the plane upon it's initial impact with the ground. After the initial contact, the plane struck the ground once more and the fuselage and front propeller were damaged. The plane came to rest facing to the north in a field near 1626 Brant St in Osage City, KS.

I took photos of the aircraft and the ground around it. The National Transportation Safety Board and the Federal Aviation Administration were notified of the crash at 1840 hours. They coordinated to remove the aircraft from scene.

The weather conditions at the time of the crash were as follows: Temperature 61 degrees Fahrenheit, the wind was out of the Northwest at 10 miles per hour, humidity was 57%, the skies were cloudy, and there was no precipitation.
