

OUTLINE OF 5/29-5/30 FLIGHT

Flight consisted of my mother Judith Now & myself Landon Now from Wisconsin to Florida for vacation. Flight there was great there were no problems and we enjoyed in very much. But down to the info you are requesting about the return flight home. My family is self-employed so we are able to book a vacation and leave a day early or later if there are flight problems. In this case we stayed one more day because of a storm that wasn't fully past thought it would be best to go the next day outlook was very good. So the start of the flight was the 29th so the night of the 28th my mother Judith Now & myself went out to dinner in Hollywood Florida boardwalk. Then we went back to the hotel to make sure we were fully packed and ready to go plus then I double checked Foreflight to see that there was no change which there wasn't. I went down the beach after that got an ice-cream came back to the hotel put the tv & was in bed sleeping by around 10:00 p.m. and slept till approx. 9:00 a.m. In the morning I checked Foreflight once again still great flying day so we went to the hotel lobby for coffee/breakfast and waited on an Uber ride to pick us up and take us to the airport KHWO at approx. 11:00 a.m. When I got there I requested that my plane was to be fueled up as I pre-flighted airplane, loaded the luggage, confirmed my flight on WSI base computer & again on Foreflight. Left KHWO airport destination 28J "leg 1" where I refueled, bathroom break and check flight again before leaving 28J to our next destination KTEL. I called KTEL airport manager before leaving 28J to make sure there was a car for us to use to go out to eat and the lobby was open for use which it was. So once we arrived at KTEL "leg 2" we took the car and went out to eat at a

nice sit-down restaurant then back to the airport where I chilled out for an hour or so and rested my stomach then check WSI computer & Foreflight of course before leaving. Then the last leg was of course from HTEL to KCLI which was a great flight I wasn't tired at the time of the accident, I was actually excited just finished looking and talking to my mother about the Milwaukee city lights and the windmills after Milwaukee that light up the skyline. Like we talked about the flight if one of the most enjoyable parts for me when going on vacation plus the total time up that day was approx. 15 1/2 not 17 1/2 do to time zone change mistake you made. Thanks and please let me know if you need another or more information about this flight.

Sincerely, Landon Now
