Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

TOTAL LOSS - outer 1/3 of left wing sheared, wings have impact damage from trees. Main Gear pushed through top skin. Engine mounts broken - Engine slight dropped forward but not separated from mount structure. Fuselage Tube Structure twisted per wrinkled fabric. Fabric multiple holes in flight control surfaces from trees.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed area from 4F1 turn E - NE to fly over Keystone Lake to OWP Sand Springs Pogue Airport for the purpose to Top off fuel tanks prior to heading to Saline County SUZ. Was going to be short stay at SUZ and return back to 4F1 in the afternoon.

I had just trimmed engine controls to 25/25 and shortly after the engine started to lose power. I started emergency procedures by switching main fuel from RT inboard to Left Inboard and then turn on the Boost pump. Set up best glide speed 90mph Engine sounded like it was trying to make power but wasn't enough to maintain altitude. Chose the grass field over the water landing. Hit the outer edge of tree line before impact with the grass field. Turned off Electrical power by master key - Exited A/C.
