Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

damage to both floats causing them to take in water. floats kept the aircraft afloat for an hour then aircraft sank during the night causing most of the damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

pre flight while tied to dock, around 19:30 taxi out (on water) pre flight check list and control check all good. take of to the south (into the wind 180 at 8kts) after take off control's did not feel right (I know because I have been flying this plane 10 years) arrested climb out and turned north as I was approaching the opposite side of the lake with trees. controls still did not seem right so turned right again to return for landing. could not arrest all of the right turn so landed hard with a right bank striking right float first damaging it causing it to take on water. I do not believe aircraft itself had much damage, No injury's. Because this is a tubing and fabric aircraft there was no emergency evacuation or evacuation of any type, we just got off/out. Floats did their job temporarily and I started the process of towing aircraft to shore. Game wardens showed up and I gave them the report they requested. the game wardens then went to shore and shuttled a state trooper out who also required a report. while doing this aircraft continued to sink and it was getting dark. Because I could not continue salvage operations I marked aircraft location with a buoy. During the night the aircraft sank. I showed the location and marker to the FAA and took pictures. The buoy was then stolen/ removed . I hired a salvage company and we searched the area using sonar and GPS coordinates. Could not locate aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

backup flight control system however this type aircraft would probably not qualify and be considered ultralight/light sport

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

I believe flight controls aileron/elevator however I cannot inspect aircraft
