NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 7-19-2016 at approximately 0830 I departed from DTO for KWEA then to KPEQ. I did my normal preflight inspection. Checked tires, control surfaces, control movement, oil level and checked both tanks for trash or water in fuel. I went through my check list and made sure everything was functioning properly. I taxied out to runway 18. All instruments were within range and the EDM 700 was showing good temps on all cylinders and EGT's. I did my standard run up per my check list and all was within operating range. I applied 10% of flaps and took off. Once I arrived at KWEA I contact my friend via cell phone and ask him to load from the right side while I continue to run my engine. Once my passenger were secured I taxi out for runway 17 and recheck all instruments including the EDM 700. Everything was within operating range. I announced on 122.70 that I was taking off runway 17 and departing to the west. I applied 10 degrees of flaps and proceeded to take off. I observed 29" on the MP and 2600RPMs then started my rotation at approximately 60-65 mph. Once I was clear of all obstacles I begin to raise the flaps. I noticed that my avionics shut off while retracting the flaps. I turned my Avionic master switch off and then back on but nothing happened, seconds later at approximately 300-400 feet I lost all engine power and immediately checked fuel switch and pull Throttle out and reapplied it and checked mixture and Prop controls. The engine started for about 2 seconds and lost power again. I decided not to troubleshoot due to my low altitude and I was already losing altitude. I scanned quickly for a safe place to land and noticed a small field to the left side. While maintaining my airspeed I made a very shallow bank towards a field. Once I touched down in the field I hit a fence which caused me to be redirected to the right. I was applying heavy brake while traveling towards some trees. I observed that I was going to hit the tree head on and decided to give hard right rudder hoping to hit the wing and Cushion the impact. Once the plane came to a stop AV gas was pouring all over us. I turned off the master switch and begin to get everyone out. I kept yelling lets get away from the plane before It blows up. Once out of the plane we all ran. A guy that lived around the area came to assist us. He called 911. Once the paramedics arrived we were transported to John Peters Smith hospital.
