☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

leading edge of left wing damaged
 cabin canopy damaged

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Friday Aug. 5th 2016 @ 13:45 the plane was loaded with 300 gallons of water & spray solution & 80 gallons of fuel. I flew 5 miles south of my departure from my private strip near Sanborn RD & proceeded to spray a 130 Acre field. The airplane was empty of spray solution & showed 1/8 tank of fuel on left side & 1/4 tank of fuel on right side, when I began to return to my point of departure. Approximately 2 miles south of my intended landing the engine started to cut out. At this point I had already pulled manifold pressure to begin cooling the engine and had descended to 400' AGL so my glide distance was going to be very short. The wind was from 260° and there was a lake on my left wing tip and Interstate 94 was 1.5 miles in front of me. I turned 135° to the right and attempted to locate the hay field I had just flown over. The terrain was very rough and I had to negotiate my turn around a tall hill that was east of me at the time. I realized I couldn't make it to the hay field, so I let the plane roll out of its right turn and I lined up with a dirt road adjacent to a corn field that ran east & west.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

narrative continued.

I felt confident that I could clear the corn field and land on the dirt road heading east. Upon clearing the tall corn I realized that there was a slough in the middle of the dirt road that I previously was unable to see. At this point I knew I was going to "winkle" so I slammed right rudder & full left aileron. I ditched the plane sliding in on the left wing tip until it lodged in the slough grass and mud. At this point the airplane stood up on the left wing tip & proceeded to lay over on its top. I immediately unbuckled & crawled out of the wreckage. No injuries were sustained and I returned the next day to begin assessing the damage & start retrieving the airplane. I am also enclosing a "google earth" image with notations of the terrain & incident site.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
