

Communication Summary

September 02, 2016

Information from: Nick Keith

Summary & Factual Information: Mr. Keith was asked if there was anything relevant that another airport could benefit from. He indicated that the most crucial thing to be taken away from this is that small town airports need to have annual training sessions with their local first responders to minimize confusion at the site. Also the local radio frequency should be able to be heard in every room of the fbo or airport office.

I can attest that the above summary is correct to the best of my knowledge:

Edward F. Malinowski
National Transportation Safety Board
Air Safety Investigator
