Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Took off of RW 28 @ 6 DB and turned to heading for JYM prior to reaching sufficient altitude to clear the trees to the south of the runway. After the initial turn to heading I attempted to climb over the trees causing an initial stall before reaching sufficient altitude to clear the trees. Then I attempted a left turn to avoid the trees while having insufficient airspeed causing a second stall leading to the crash. After impact ~~and~~ I checked myself for injuries finding my left ankle and right femur were both broken and pinned. After checking myself I checked my passenger for injuries. His were sustained to his jaw. I verbally walked him through how to get out and he proceeded to exit. I turned off the electrical power after spotting a fuel leak, then used my passengers phone to call for help, who then called 911, then called my father, and then proceeded to wait for emergency services to arrive.
