NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

I was participating in EAA Young Eagle Flights at Plainwell Municipal airport on Friday May 26. I was on my third flight of the day and was returning to 61D after the 15 minute flight. I preceded downwind, turned base to final and then noticed an airplane back taxiing 27. I made a couple of 360's until the airplane cleared 27. I then turned on final with a little to much attitude and landed long, even with hard breaking overran the runway, ending up in a deep ditch. The front of the airplane sustained major damage, there were only minor injuries.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

When there is an interruption in the normal landing procedure, it would be best to leave the area and start the landing pattern over again. In other words execute a go-around to establish the proper numbers for a landing.
