NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

First, I want to share my (and other's) opinion of Cory's overall professionalism, extreme attention to detail, perfectionism, and intelligence. Especially in relation to flying. I share this information because I believe a pilot's skills and experience are pertinent to the evaluation of aircraft incidents. As an engineer with a PhD and a pilot with a high level of experience, Cory cared for the aircraft and flying with a high level of knowledge, scrutiny to detail, and care for his passengers. He practiced his stick and rudder skills and aircraft management frequently. He flew his Piper Cherokee to Alaska and back. He also had experience with short-field and soft-field airports, and took every opportunity to learn while flying.

My memory and perspective of the incident is as follows.

Days prior, as he always did before a cross-country trip, Cory researched the regional (East coast) weather. The morning of, we reviewed the flight conditions like we usually do before a flight. He expressed his comfort in the given conditions. When we arrived at 02C, I took our 6-month old son, Ben, to the terminal to prepare him for the flight. I stayed in the terminal until the hangar door opened. [Cory stored the airplane in the hangar overnight to prevent icing.]

I will add here the information I received from Cory's mom, Linda, regarding pre-flight of the airplane. Cory explained to Linda that he always packs the aircraft to protect his passengers. For example, he shared that he, for this flight, packed the bag of clothing in front of me and a comforter/blanket behind Ben in case of impact. It would seem ironic that he had this discussion before this particular flight, but Cory enjoyed discussing all things flying, especially with his family.

Cory and I pushed the airplane out of the hangar. After securing Ben in his car seat, I got into the backseat and buckled my seat belt. Cory performed his usual final inspection of the aircraft, got in, and buckled his seat belt. He taxied the aircraft to the runway and performed a run-up. During the run-up, I noted that Cory, as always, checked the flight controls, engine power, etc. He had properly deflected the ailerons for the wind conditions. He asked if Ben and I were ready. After I confirmed, Cory applied full power while holding the brakes, released the brakes and continued "flying the aircraft" as we continued down the runway. Being in the back seat in the tail-wheel aircraft, I could not see out the front window. Instead, I watched our son as he napped in his car seat.

I felt the aircraft depart the ground and then quickly come back down. I simply assume Cory felt the need, for whatever reason, to abandon the take-off. I felt us unnaturally veer left and thought "more right rudder." I still felt safe since I knew how much rudder authority the aircraft had. Then, I felt the aircraft turn further left. I felt concerned that we were leaving the runway and thought he was steering to avoid the terminal and fuel tanks. At this time, I looked at Cory (I had good sight of the entire right side of his body) and noted that he was vigorously pumping the rudders back and forth (left and right). It was at this time everything went black.

I awoke on, what I had assumed at the time, the airport's apron. In actuality, I was (I think) on the taxiway further back from the terminal. I was in horrific pain and felt that my body was twisted. I could not move my legs or body, and I couldn't see anything (just blackness). I heard footsteps and voices coming closer. I heard Linda tell me that Ben is okay and that Cory is not doing well. I heard someone say that they had to move me to (I think) get Cory out of the plane. I screamed in additional pain when they started moving me and, again, everything went black.

That concludes my memory of the incident.
